### **DOCTORAL PROJECT/DISSERTATION**

The Doctoral Project is a program design titled "Traumatic Brain Injury and Posttraumatic Stress Disorder Rehabilitation Program" that focuses on rehabilitation of individuals with acquired brain injuries and Posttraumatic Stress Disorder. The Doctoral Project extensively investigates current research on effective treatment modality, effective preventions, and effective rehabilitation for individuals suffering from deficits such as, memory, concentration, low threshold for frustration, and, most commonly, anxiety and depression. The program also focuses on providing support and resources for caregivers.

#### **STARRT Program Therapist & Intake Assessment**

Sexual Trauma & Risk Reduction Treatment  
The Chrysalis Center  
Fort Lauderdale, Florida

The **STARRT** outpatient program focuses on treating children and adolescents with problematic sexual behavior. STARRT serves children and adolescents displaying a wide range of sexual behavior problems. The goal of the STARRT program is to stop the cycle of child abuse and sexual offenses. Emphasis is placed on increasing client awareness of their personal sexual behavior problems and patterns, teaching them ways of monitoring themselves effectively and fostering the development and internationalization of self-control. Responsible behavior and safety are promoted throughout the program.
